

Saatvik Karthikeyan

Investor Pitch Deck

Patent-Holding Young Inventor from Puducherry

Government of India Patent No. 590011

September 2026

About Saatvik

Saatvik Karthikeyan is a 17-year-old inventor and engineer from Puducherry, India. Currently pursuing first-year ECE (Electronics and Communication Engineering) at SRM University, Saatvik has already achieved what most engineers take decades to accomplish. Driven by a simple instinct to build better ways of doing things, Saatvik transforms everyday problems into engineered solutions.

Saatvik's journey began with early robotics experiments and evolved into securing a Government of India patent. With 4 patents in portfolio (1 granted, 3 pending), Saatvik represents the new generation of India's innovation ecosystem, aligned with the government's vision of Viksit Bharat 2047.

The Patent Portfolio

Patent	Status	Timeline
Contemporary Device for Dum Cooking Method	Granted	May 22, 2026
IoT & Sensor-Based Apparatus for Skin Cleansing	Pending	Grant Imminent
Integrated Motorcycle Recovery Dolly System	Pending	Grant Imminent
Mobile Support Dolly for Workshop Transport	Pending	Grant Imminent

Why Partner with Saatvik

Government Approval: Patents granted and approved by Government of India. Verified legal protection and intellectual property security.

Market Validated: Recognized by 10+ institutions including Government bodies. Endorsed by Lt. Governor K. Kailashnathan.

Young Innovation Leader: Age 17, self-taught programmer and engineer. Fresh perspective on age-old problems with cutting-edge solutions.

Growth Potential: 4 patents filed. 1 granted and 3 with grant imminent. Continuous innovation pipeline.

Aligned Vision: Supporting India's Viksit Bharat 2047 mission. Focus on practical, accessible innovation for everyday problems.

Flexible Terms: Customizable partnership structures. Manufacturing licenses or co-production partnerships available.

Partnership Opportunities

Saatvik offers two primary paths to partnership. Manufacturing licenses provide entry-level access with exclusive territorial rights. Co-production partnerships enable joint venture development with profit-sharing models.
